

**Number of players:** 4-8

**Recommended ages:** This game is great for ages 4 to 99!

**Here's what you'll need to play Help Your Neighbour:**

- 1-2 decks of cards. You'll need one full suit for each player.
- 2 dice
- Poker chips – 15 for each player
- A bowl to be the 'pot' for the poker chips

### Setting up the Game

Remove the kings, aces and 7's from the deck. You won't need the jokers either.

Each player will get 10 cards from the same suit. They should arrange them face up in front of them as shown below.

Each player will also get some poker chips. You can decide how many, and it depends on how long you want the game to last. Recommend 10 for families with young kids and 15 if you want your game to last longer.

## How to Play Help Your Neighbour

Each player will put a chip in the pot to start the game.

The first player will roll the dice, then they will flip over the card that matches the number rolled. Jacks are 11, Queens are 12.

Here's the 'Help your Neighbour' part! During the game play, if a player rolls a number they do not need (because that card is already flipped over), it will go to the next person who needs it, going clock-wise around the table. This ends that player's turn and play resumes with the player who accepted the roll. The player who accepted the roll ALSO gets to roll and take their own turn.

As the game progresses, a player will likely roll a number that everyone has already flipped over. If that happens, they keep rolling until they get something that they can use, or someone else can use.

During game play, anyone who **rolls a 7** puts a chip in the pot. This ends their turn.

The first person to turn over all of their cards wins! Each player puts a chip in the pot for every card left face up. Then the winner gets ALL the chips in the pot!

Then you can continue to round 2, etc. Once a player is out of poker chips, they are out of the game.
