

Interior Health

Lifeline Emergency Response Program *Volunteer Opportunity*

The Interior Health Lifeline Program assists the physically challenged, the chronically ill and elderly individuals to maintain independence in their own homes. We are currently recruiting volunteer installers to go to the homes of new Lifeline subscribers to educate them about Lifeline and to install equipment in their homes. Complete orientation is provided, and volunteers are reimbursed for their travel expenses.

Individuals interested in volunteering can call the program at 250 762-0200, or e-mail: david.kelcey@interiorhealth.ca For information about how Lifeline works check out our Interior Health website: www.interiorhealth/lifeline.aspx .
