

HOW YOU CAN HELP CLEAR THE WAY

- Please use caution when driving in winter conditions. Avoid travel when possible in heavy snowfall.
- Park off the street for up to 48 hours after the snowfall ends to help plows clear snow from residential areas. Failure to move vehicles from the road right of way may result in damage to vehicles as the plow passes and, in cases where plows cannot safely pass, ticketing and towing of the vehicle.
- Pile snow on your property and keep storm drains and fire hydrants as clear as possible. Don't shovel snow from driveways and sidewalks back onto the street.
- Windrows left by passing plows are inevitable and plows may take several passes to clear a roadway. To minimize deposited snow, pile snow to the left (when facing your property).
- Remove snow and ice from sidewalks bordering your property. Keep a shovel, sand or deicer as essential tools for the season.
- Be patient and, if you are able, help out a neighbour or a friend!

CLEARING THE WAY

Peachland's roads and sidewalks are cleared and sanded based on priority to ensure the most heavily used routes and important emergency corridors are passable during snow events. During active snowfall, crews continue to work on Priority 1 routes and Priority 2 and 3 roads may need to wait.

Peachland's crews are hard at work before, during and after the snow falls to keep our community moving.

Priority 1

Bus routes, major arterial roads, steep hills, intersections, school zones

Plowing

- Driving lanes plowed within 12 hours.

Sanding

- Intersections, stop signs, hills, curves, school zones, bus stops sanded within 4 hours of snowfall

Priority 2

Secondary collector roads

Plowing

- Driving lanes plowed to a compacted snow surface within 36 hours.

Sanding

- Intersections, stop signs, sanded within 6 hours of Priority 1 completion.

Priority 3

Residential side streets, flat roads, cul-de-sacs

Plowing

- Driving lanes plowed to a compacted snow surface within 96 hours.

Sanding

- Intersections, stop signs, sanded within 12 hours of Priority 2 completion.

PLOWING PEACHLAND

- There are 140 roads in Peachland totaling 65 kilometres. Each road can take two to four passes to completely plow.
- Operators strive to get the roads in safe drivable condition as soon as they can. Equipment breakdowns are unavoidable and can create frustrating delays in plowing and sanding.
- Snow plowing and sanding may also be delayed by vehicles disabled in deep snow, vehicles parked on the roadway, severe weather and whiteout conditions, refueling, sand refilling blade replacement and unforeseen emergencies.
- Snow Removal is undertaken when accumulation prohibits the normal seasonal movement of vehicles and pedestrians or impacts sightlines.

SIDEWALKS

- Property Owners are responsible for clearing snow and ice from sidewalks or footpaths bordering their property.
- Our Operations Department and Parks Department remove snow from sidewalks adjacent to civic buildings, selected parks and pedestrian accesses.
- The District will plow sidewalks on major arterial routes that have no abutting residences or businesses, sidewalks fronting bus routes, schools and businesses as well as walkways to, from and through parks and public areas.
