

Eric Hall - Biography

I was born in Nottingham, England and moved to Vancouver to work in computer systems development for a large forest products company, Weldwood of Canada.

I was the computer manager for Canadian Dental Supply in Vancouver for 16 years until that family business was sold. I was responsible for computer systems in Vancouver, Edmonton and Toronto.

I changed careers to become a tour manager and have looked after over a hundred tour groups travelling the country from coast to coast. I have led city tours of every major city in Canada from Victoria to Halifax.

In the 16 years we have lived in Peachland, my wife Marion and I have been involved with many community groups - the Newcomers, the Little Schoolhouse Society and the Peachland Trekkers walking club.

As a member of the previous Council, I supported the voice of the public. I worked to keep expenses under control.

In the last four years, I have followed the decisions of Peachland Council and I am knowledgeable on current issues.
